## 1. Computer, Server Supply, Support and Maintainance

With over 30 years of Computer Supply and maintenance in Oman Market, We are one of the leading computer providers in the Market. We provide our Clients with expert service and ongoing IT support which helps them in Efficiency and Business Growth

## 2. Networking and Structured Cabling

Structured Cabling is a crucial Element of every Corporation. We have the right expertise in providing the correct solution and testing the performance of the network for optimum efficiency.

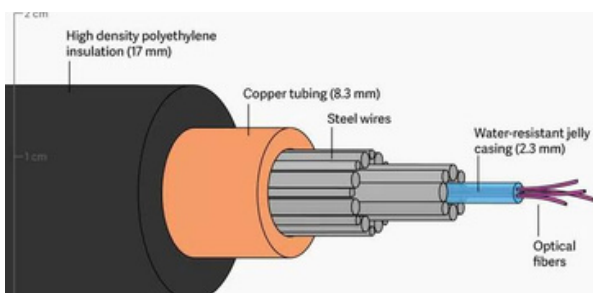

In addition to connecting PC's and Servers to the Network, Structured Cabling is also used for connecting printers, IP CCTV Systems, Speaker Systems, Wireless access points and Telephone systems.

We can also offer computer cabling installations using structured cabling or wireless networks to meet customer satisfaction.

## 3. Supply of Fibre Optics and BMS cables

A fiber optic cable is a network cable that contains strands of glass fibers inside an insulated casing. They're designed for long-distance, high-performance data networking, and telecommunications. Compared to wired cables, fiber optic cables provide higher bandwidth and transmit data over longer distances. Fiber optic cables support much of the world's internet, cable television, CCTV and telephone systems.

## 4. CCTV / security and surveillance

Camera systems and Home/Office alarms play a crucial role in keeping your home and offices safe. We've got a full range of solutions, whether you're looking for a simple door alarm or a comprehensive security system. We offer a full range of camera options, including analog, HD CCTV, and IP cameras. Additionally, we've got several different styles of camera, including box, bullet, dome, and PTZ (pan/tilt/zoom) cameras for whatever your surveillance needs may be.

That's not all. We also have the DVRs or NVRs necessary for recording and storing the footage.

## 5. Biometric Access control Time and Attendance

Time & attendance system is a system for tracking employee time spent in the workplace, either through manual or automated processes, for the purpose of payment for hours worked, number of items produced or type of work performed. Biometric Access Control Systems allows only authorized

# 1. Corporate IT Infrastructure Solutions

Technology powers nearly every aspect of today's businesses, from an individual employee's work to operations to goods and services. When properly networked, technology can be optimized to improve communication, create efficiencies and increase productivity.

We provide an IT infrastructure which is flexible, reliable and secure, it can help an enterprise meet its goals and provide a competitive edge over its competitors in the market. Alternatively, if an IT infrastructure isn't properly implemented, businesses can face connectivity, productivity and security issues—like system disruptions and breaches. Overall, having a properly implemented infrastructure can be a factor in whether a business is profitable or not.

With an IT infrastructure, a company can:

- Develop and launch solutions to market with speed.
- Collect data in real time to make quick decisions.
- Improve employee productivity
- Provide a positive customer experience by providing uninterrupted access to its website and online store.

## 2. Smart Automation Solutions

### **1.4- Audio Visual Solutions**

As an Audio Visual Systems Integrator, AV Consultant and AV service provider, we provide design, installation and service solutions to facilitate enhanced communications for any organization. We enjoy helping customers become more effective through interesting and dynamic uses of technology. Our key target is to deliver an AV solution in a professional way where you don't need to involve yourself in the technical details you can control any of our systems from a programmable touch panel controller screen any size you prefer, mounted on your wall or your table or wireless, having your own logo and colors,

### 3. Inventory, Accounting, ERP and Customized Softwares

ERP inventory management is an integrated approach to business operations. Our ERP inventory management systems help businesses manage each of their business operations from a single platform. Typically that includes the management of inventory, finance, operations, planning, and logistics.

We have been specialized in implementing our own customized softwares that are tailored for your operational needs and convenience. Our team will discuss understand and guide you through each step of building the software targeting your needs.

### 4. System Integration

We bring together components and subsystems from various manufacturers and technology disciplines to deliver an optimized, integrated and cost effective IT and Communication solutions.

All integrated systems undergo extensive testing in our System Integration Centers. This testing can be the subject of a witnessed "Factory Acceptance Test" prior to shipping and installation at the client works.

## 5. Systems, Industrial equipment and peripherals Supply

Depending on Functional Design Specification (FDS) documents and customer approval, our supply chain management and logistics team procures and obtains deliveries of all the equipment and accessories from multiple global suppliers and partners. The supply chain management activity requires highly specialized skills and knowledge about global procurement process and procedures and the same is deeply embedded into our team to supply the required systems and materials on time as expected. Working with Multi National Corporation in the Oil and Gas industry has given us a solid reputation in this industry.

## 6. System installation, testing and training

We have an experienced team for on-site installations. We are familiar with the specific site safety and work permit requirements of the major corporations in the region. This facilitates efficient and trouble free site works with assured on time scheduling. Integrated System Testing is done at the customer premises and can be subject to client or Independent Testing Authority witnessing and approval.

We have experienced trainers who can conduct all aspects of training from Solution Basics to Operation & Maintenance. Such training is conducted either in house or at the customer's premises.

## 7. Support Operations and Maintenance

WIDE Solutions provides comprehensive support and maintenance for its clients operations based on the defined Service Level Agreements, providing a support and service for their operations to keep their on going operations streamlined without any hindrance.

## 8. Business Consultation

WIDE Solutions provides consultations process and support for managing your projects in any IT or smart technologies.

IT is probably not being your core business. Trying to solve all of your IT challenges internally can become a major distraction. These challenges can be costly, and other aspects of your business could suffer.

WIDE SOLUTIONS offers expert, affordable IT consulting services to help you achieve your short- and long-term IT objectives. With our well experienced project team, we are ready to tackle your IT strategy or special projects.
